

Catalpa Gardens

Chicago, Illinois

New Homes Magazine - "Chicago's Best New Mid-Rise, 2005"

Catalpa Gardens consists of three eleven story residential towers located on a landscaped parking base and connected by enclosed glass bridges. 126 condominium dwellings with terraces, balconies or roof penthouses comprise this colorful urban development. Units range in size from 657 - 1,408 sf and share common amenities such as garden terraces, rooftop fitness and community rooms, a dog walk and lake views.

The colorful palette of the building's exterior assures it as a neighborhood landmark. The modern detailing compliments the structure's massing so as not to overpower the subtle elements of the design.
